BLUE

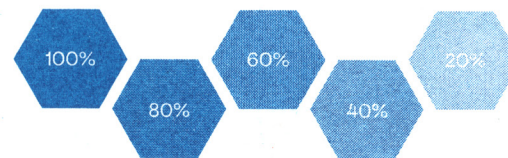

[blu:]

NOUN, ADJECTIVE, RISO COLOUR

Blue is as close as you can get to a true blue and lacks any tone of black, yellow, red and green. It's not a dominant colour but can, if used in a higher percentage, give a full impression. As a primary colour, it mixes well with most others to create vibrant results.

SPECS

Hex #0078bf
RGB 0, 120, 191

ABOUT THE RISO COLOUR SYSTEM

Risograph printers has its own colour system and can't be directly translated to other systems like pantone, cmyk or rgb. The inks are semi-transparent and mix with other inks to create a third colour.
